

# KSI Satellite

## Control & Monitor

The KSI Satellite is a multi-function access point to your network of GFMS Software and Security Asset Managers. Enrollment, authorization, information and much more are no longer limited to the locations where assets are stored. This compact device expands your access to the GFMS network with additional functionality and additional points of interaction.

**Dimensions (inches):**  
4 $\frac{3}{8}$ " H x 13 $\frac{5}{8}$ " W x 3 $\frac{1}{2}$ " D

Provides remote log in, including dual/triple PIN authorization to any other GFMS enabled KSI product on your network

Supports all KSI authentication methods including keypad, fingerprint and badge readers

**ALARM: KEY BOX 4**  
**DOOR ALARM**  
PREV      NEXT      ACK

Provides access to remote reporting information (in addition to standard GFMS reports) related to asset status, system status and alarms for any KSI product on your network

PIN:\*\*\*\*  
7/7/2011      8:29:45  
CLKIN    NONE    CLKOUT
