

Chemical Spray Station

Smart Storage

KSI's OC Station provides controlled distribution and removal from service for OC spray canisters. Each station is network ready for remote access and provides live updates to our GFMS software.

Track and Report

With our KSI Smart Buttons, spray containers are individually tracked. In addition to monitoring usage, our software allows for the creation of functions time zones, email alerts, and a variety of others to restrict access.

Accurate Evaluation

Upon return to the station, the OC container is weighed by our internal scale and then evaluated for return to service or for disposal.

Multiple Sizes

Cabinets are available for varying sized canisters. Standard sizes are MK3 and MK4. Cabinets holding 20, 40, or 80 canisters are available.

Additional Features

- Automatically import users and groups to GFMS software to reduce data entry and remained synched with your existing access control system
- User Identification options include PIN, Card Swipe, Proximity, and Biometrics

*Actual product may vary from images shown.

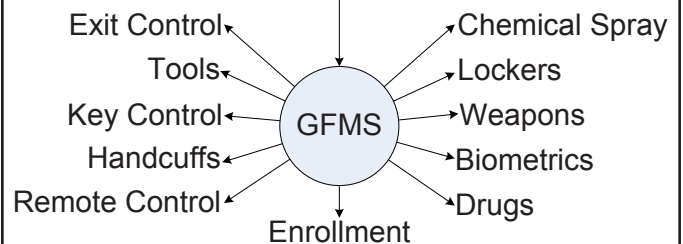

Each system includes a separate locker for cans in and out of service.
